

GREENBOR™

NATURALLY MINED ORGANIC FERTILIZER

Continuous release boron to BOOST YIELD and QUALITY

KEY BENEFITS:

- Continuous Release
- Only boron product gives measurable increases in soil B Levels.
- Very safe even levels of 300kg/ha did not cause toxicity
- Cost effective.
- Wide range of yield improvements over many crops (Brassicas, Pasture and Tree Crops)
- Can easily be mixed with fertilizer or lime

KEY FUNCTIONS IN THE PLANT:

- Root growth
- Structural strength
- Flowering/Fertility
- Size and quality of fruit
- Skin strength of fruit
- Fruit firmness and storage
- Nutrient uptake (Calcium)
- Disease resistance
- Fruitset

SPECIFICATIONS:

- Calcium and Magnesium Borate
- 10% B
- Naturally mined organic product

GREENBOR™ is designed to be applied annually at the following rates if soil results indicate the need for boron. These application rates will provide season long availability. Soil test results will indicate whether additional amounts are required for the season.

APPLICATION RATES:

Orchard Crops (Apples, Kiwifruit, Grapes)	25 - 40 kg/ha
Avocados	25 - 60 kg/ha
Brassicas and forage crops	25 - 40 kg/ha
Potatoes	25 - 40 kg/ha
Pastures	15 - 40 kg/ha
