

REACTION FERTIGATE N

32% N (W/W)

TAILORED SOLUTIONS, PROVEN RESULTS

A liquid combination of nitrogen, derived from ammonium nitrate, urea, sulphur and seaweed. This combination offers growers a complete full range of nitrogen materials that each behave differently when in contact with plant foliage and soil

Directions for use:

- Thoroughly shake the container before use.
- Agitate mix while filling tank and agitate until spraying is completed.
- When using the highest recommended rates use the highest recommended water rates.
- Do not spray any crop in direct sunlight or at times of high temperature and rapid drying.
- Always use protective clothing and equipment when handling concentrate and when spraying.

- Ensure spray equipment is clean before use and that all equipment is washed after use.
- Store in a safe place and do not allow prolonged exposure to high or low temperatures.

Agri Technovation Ltd. products are compatible with a range of other agrichemicals. Stability can be checked by adding a proportionate amount of this product to a sample of previously mixed spray.

Crop	Application rate L/ha	When to apply	Minimum water rate
