## TAILORED SOLUTIONS, PROVEN RESULTS

A quality granular fertilizer combining N, P, K, S with additional trace elements, easy to mix, easy to apply.

### Directions for use:

- Always use protective clothing and equipment when handling and applying concentrate - wash afterwards.
- Ensure equipment is clean before use and all equipment is washed after use.
- Store in safe dry place and do not allow exposure to moisture.

### Mixing Products:

- First add the HG-AVO.
- Then mix in additives such as extra trace elements.
- Other agrichemicals should be added last.

### Application Rates:

Typical application rates vary between 25 - 150 kg/Ha depending on product, crop, soil fertility and purpose. With a maximum of 6 applications per season.

Your representative will advise you on the appropriate application rate for your needs.

### Compatibility:

HG-AVO contains sulfur and will not be compatible with calcium and some nitrogen products.

Stability with other products can be tested by doing a small jar mix.

### The Agri Technovation Crop Programmes:

Are tailored to your farm's requirements and includes a combination of proven products which focuses on the animal, the pasture and the soil. The programme may include, soil and soluble fertilizers as well as our extensive range of multi-blend liquids, soil conditioners and superior range of minor elements. This combined with our monitoring service ensures optimum results for your farming dollar.
